**The local choice for  
Sidlesham Ward**  
Including Hunston

## Dear Resident,

The last four years have been the most challenging for local government but Chichester District Council has managed significant change, reduced costs, maintained services, balanced its budgets and frozen council tax. I have been involved in all these decisions and am proud of the excellent council of which I have been a part for some years.

Our special area needs protecting whilst helping its residents to live comfortably and enjoy the benefits that ensue. The decision to set up a transit site for gypsies and travellers will help the authorities to deal with the illegal encampments we suffered from in the recent past and the cost of clearing up.

The decision to retain New Homes Bonus monies to pass on to Parishes has been very successful and, with developers contributions, has enabled funding for projects in both Hunston and Sidlesham to be found.

The high cost of housing in the district remains a difficult issue but the Conservative policies to enable affordable housing to help our hard working young people to realise their aspirations to a home of their own, remain a priority for the council.

The council has managed our money very well in extremely difficult times of low returns and will continue to identify initiatives to enshrine income whilst maintaining council tax at one of the lowest rates in West Sussex.

Business must be supported as the main driver for our local economy. Farming and horticulture, our traditional local industries – not least the cherished income from our burgeoning tourism, leisure and entertainment activities, and innovative small and medium businesses—are the life blood of any community and the council is well placed to give support and advice.

Please support me at the election on the 7th May to help continue this work for us all.

I can be contacted: [triciatull@btinternet.com](mailto:triciatull@btinternet.com) or by telephone 01243 512660.

Yours sincerely,

*Tricia*
